# DSC 540: Assignment 6 (Fuzzy Logic Models)

## Part 1 - Theory

Rule 1: If  $x$  is  $A_3$  OR  $y$  is  $B_1$  THEN  $z$  is  $C_1$

Rule 2: If  $x$  is  $A_2$  AND  $y$  is  $B_2$  THEN  $z$  is  $C_2$

Rule 3: If  $x$  is  $A_1$  THEN  $z$  is  $C_3$

$$\mu(x=A_1) = 0.5$$

$$\mu(x=A_2) = 0.2$$

$$\mu(x=A_3) = 0.0$$

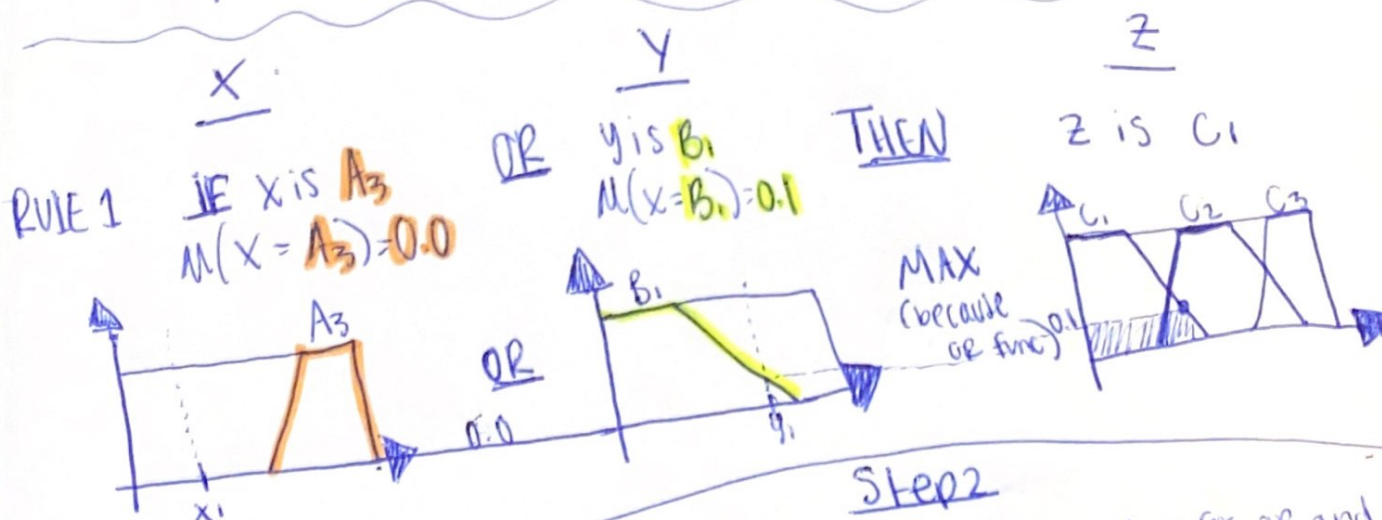

$$\mu(y=B_1) = 0.1$$

$$\mu(y=B_2) = 0.7$$

$$\mu(y=B_3) = 0.0$$

### Step 1

using the graphs, find where the actual inputs ( $x_1$  &  $y_1$ ) or crisp inputs, and see where they land on each graph below

### Step 2

For each rule, (using max for OR and min for AND) combine the placement where the crisp inputs landed on each graph, to find based off each rule, what the  $z(C_i)$  region is.

Step 2 cont

X

Y

Z

RULE 2 IF x is  $A_2$  AND y is  $B_2$  THEN z is  $C_2$

$\mu(x=A_2)=0.2$

$\mu(y=B_2)=0.7$

Min  
(before  
AND)

X

Y

Z

RULE 3 IF x is  $A_1$  THEN z is  $C_3$

$\mu(x=A_1)=0.5$

THEN

z is  $C_3$
